

Roy J. Carver Department of Biochemistry, Biophysics and Molecular Biology

SEMINAR SERIES FALL 2018

August 30	Mohan (Moe) Gupta GDCB – Iowa State University	Seminar Topic: Microtubule-generated Tension in the Spindle Assembly (Host: Kristen Johansen)
September 6	Takanari Inoue Johns Hopkins University	Seminar Topic: Generating Force in Living Cells at Will (Host: Stone Chen)
September 13	Changjian Feng University of New Mexico	Seminar Topic: Nitric Oxide Synthase (Host: Eric Underbakke)
September 20	Thomas Smithgall University of Pittsburgh	Seminar Topic: HIV-1 Nef (Host: Lauren Kueffer)
September 27	Erik Nielsen University of Michigan-Ann Arbor	Seminar Topic: Analysis of the Roles of CSLD Proteins (Host: Olga Zabolina)
October 4	Davit Potoyan Iowa State University	Seminar Topic: Computational Modeling of Gene Regulation (Host: Kristen Johansen)
October 11	Vincent Archambault University of Montreal	Seminar Topic: Greatwall-PP2A Axis in Drosophila (Host: Jorgen Johansen)
October 18	Gregory Smith Indianapolis Museum of Art	Seminar Topic: Solving Art Mysteries (Host: Guru Rao)
October 25	Catherine Musselman University of Iowa	Seminar Topic: Nucleosome Conformation n Reader Domain Binding (Host: Vincenzo Venditti)
November 1	Dipali Sashital Iowa State University	Seminar Topic: To Be Announced (Host: Kristen Johansen)
November 8	Alex Grishaev NIST	Seminar Topic: To Be Announced (Host: Vincenzo Venditti/Adam Barb)
November 15	Blanton Tolbert Case Western Reserve University	Seminar Topic: To Be Announced (Host: Walter Moss)
November 22	Thanksgiving Break	
November 29	Aileen Keating Iowa State University	Seminar Topic: Ovotoxicant-induced DNA Damage (Host: Kristen Johansen)
December 6	Brett Van Veller Iowa State University	Seminar Topic: Molecular Excited States and Interactions (Host: Eric Underbakke)

Every Thursday at 4:10 p.m. - Room 1414 MBB (unless otherwise noted)
